

Global Land Surveying, Inc.

Why choose Global Land Surveying?

- *Experience*

Global Land Surveying has been trusted by many title companies, real estate agents, lenders, homeowners and attorneys in preparing over 17,000 residential and commercial surveys since 2002. Jason Morgan, our President and Registered Professional Land Surveyor, has 20 years of experience surveying in the DFW metroplex.

- *Customer Service*

We are dedicated to ensuring our clients are the most well-served individuals in the industry. As part of our dedication to customer service we do not charge "rush fees". The surveyor is always available to answer any questions you may have. Your 100% satisfaction is guaranteed.

- *Speed and Reliability*

Through the years, Global Land Surveying has continually developed software and procedures to ensure that we will deliver a completed survey as fast or faster than any other surveying company in town. Three day turn-a-rounds are standard and 24 hour turn-a-rounds are often done when requested with no additional charge. That's right NO "rush fees".

- *Competitive price given prior to beginning work*

Unlike most local surveying companies, Global Land Surveying will provide the cost of every survey by email confirmation prior to beginning any work. This will ensure that you and your client don't end up with any surprises at the closing table. Our standard lot and block surveys begin at \$355 plus tax.

- *Easy to read and attractive color surveys*

All of our surveys are drafted using AUTOCAD the leading computer aided design software and industry standard. All surveys are printed in color and one laminated copy will be provided for the permanent records of the home buyer. In addition, a PDF copy will be emailed upon completion for electronic distribution and storage.

- *Fully Insured*

Global Land Surveying carries errors and omissions insurance policy underwritten by Lloyd's of London to ensure that our clients are well protected.

*Serving the greater Dallas-Fort Worth area
with fast and reliable service since 2002.*
